

# MANAGING COVID-19 SAFELY

Leveraging technology to keep homeowners and employees safe while we protect your property.

1

## Training & Awareness

To ensure the safety of our workers and homeowners, Mid Kansas Exteriors has researched and follows all requirements provided to us by government agencies, including the Centers for Disease Control & Prevention ([www.cdc.gov](http://www.cdc.gov)). These are standards that we share and train our staff on daily.

2

## Personal Protective Equipment (PPE)

Even before safety was cool (because it is, right?), Mid Kansas Exteriors was investing in protecting our employees and all people surrounded by our business. Today PPE for our team also includes hand sanitizer, Lysol wipes for vehicles and an internal health plan to ensure workers on the job are feeling 100% healthy at all times.

3

## Technology

Mid Kansas Exteriors is a leader in utilizing technology for safety and efficiency in the roofing exteriors industry. From measurements (Hover & RoofSnap) to interactive photo documentation (Company Cam) & professional inspection reports (SumoQuote), technology allows us to give you better information about your property, fast.

4

## Web Meetings

As a business, we always prefer to meet customers face-to-face before we are trusted with protecting their home. Thankfully Zoom and other web meetings allow us to maintain the highest level of communication as we walk you through photos from our detailed inspection and share product options for understanding the best options you have in caring for your home.

“As a business, our first commitment is to safety. Safety for our employees and the property owners that trust us to care for their properties. As President of Mid Kansas Exteriors, I can always be reached to speak with you directly about our safety program and best practices.”
